Electric Storm Damages Farm Buildings

An electric storm accompanied by a heavy downpour of rain hit northeast of Carbon early Monday afternoon and did considerable damage to farm buildings in the vicinity. Lightning which struck at the R. D. Barnes farm practically caused switch boxes to explode and blew fuses into the wall. Two radios in the house were damaged and one is believed beyond repair. Wiring of all farm buildings was damaged and complete rewiring may be necessary.

The thunder bolt also started a fire in the roof of a straw covered pig house. Volunteer firefighters from Carbon and neighboring farms assisted in subduing the fire which smouldered in the straw for several hours.

Lightning also struck at the Hugh Isaac farm where four power line poles were splintered and the line cut. The lightning travelled along a barb wire fence to the well where it burnt out the coil on a motor. R. G. Sayler had wiring damaged and fuses and lights burnt out by lightning. Other reports of damage have not yet been confirmed. No livestock has been reported killed.

The Duke of York Chapter I.O.D.E. has just completed a very successful campaign in the Carbon district for the Canadian Cancer Society drive now in progress across Canada. Generous support from the business men and Carbon and district residents resulted in a total of \$441.60 being subscribed, which exceeds last year's total by over \$200.

Legion Members Hold Ladies' Night

Carbon Legion members were hosts to their wives and lady friends at a ladies' night party in the Legion Hall Monday evening. During whist Mr. Bill Spragg of Calgary treated a receptive audience to an excellent display of humorous magic. Whist winners were: Mrs. Bob Tricker of Swallow, 1st; Mrs. Jack Barr, 2nd; and Mrs. Cecil Paget of Swallow, consolation. An excellent lunch brought the evening to a close.

Preparations for the big Carbon Lions Club Sports Day on Wednesday, June 7, are now well under way and posters announcing the event will be out shortly. The program will include a parade, baseball tournament, children's races, bingo booth and other attractions. Refreshments will be served on the grounds. A dance at night in the Scout Hall will wind up the entertainment. Be sure to attend.

Mrs. Morris Switzer and daughter are visiting in Calgary at the home of her parents.

Dick Poole recently crushed a finger between two mine cars at the Atlas mine in East Coulee and is recuperating at his home in Carbon.

1949 Income Of Farmers Little Lower

OTTAWA. — Net income of Canadian farmers from farming operations last year declined from the record level reached in 1948, but was still substantially above all other years.

Preliminary estimates by the bureau of statistics place farm net income for the year at \$1,537,387,000, about four per cent. below the revised all-time high of \$1,600,336,000 for 1948.

The decline from 1948 was the result of somewhat smaller cash receipts from the sale of farm products, reduced value of income in kind, declining inventories of grain and a continued increase in farm operating expenses and depreciation charges.

Year-livestock inventories displayed an increase for the first time since 1944, but this gain was more than offset by a substantial decline in year-end, farm-held stocks of grain.

Net farm income was higher in the three maritime provinces, Quebec and Saskatchewan, the grains ranging from less than one per cent. in Quebec to nearly 25 per cent. in Nova Scotia. The decline in the other provinces varied from less than two per cent. in Ontario to over 20 per cent. in British Columbia.

Preliminary estimate of net income by provinces follows, with totals for 1948 in brackets: Prince Edward Island \$11,400,000 (\$11,800,000); Nova Scotia \$11,700,000 (\$9,400,000); New Brunswick \$25,000,000 (\$23,700,000); Quebec \$244,700,000 (\$243,600,000); Ontario \$407,400,000 (\$412,800,000); Manitoba \$140,000,000 (\$174,300,000); Saskatchewan \$382,600,000 (\$374,900,000); Alberta \$279,300,000 (\$305,700,000); British Columbia \$35,300,000 (\$44,900,000).

Egg Production At Par With 1949

OTTAWA. — Egg production in Canada this year has been running close to the 1949 level, the bureau of statistics reported.

Net production of eggs in March totalled 34,813,000 dozen, compared with 34,595,000 in the corresponding month last year. During the first three months of the year 90,640,000 dozen were produced, against 91,210,000 dozen in the corresponding period of 1949.

Production of eggs in western provinces during March, with figures for the corresponding month last year in brackets: Alberta 3,805,000 (3,864,000); Saskatchewan 3,405,000 (3,604,000); Manitoba 2,878,000 (2,803,000); British Columbia 2,634,000 (2,722,000).

Controlled Farm Methods Improve Grain Yields

WINNIPEG.—Experiments to determine how carefully controlled farm methods can improve grain yields, conducted at the Dominion Experimental Farm at Morden, Manitoba, have demonstrated that production may be doubled.

Tests have been made over a five-year period and records released by Superintendent W. R. Leslie show how yields may be stepped up in all the grain growing districts. Comparative figures of yields per acre on the experimental plots at Morden and by the run-of-mine methods are:

	Morden experiments	Average farm yields
Wheat-bread varieties	45.8	22.3
Wheat (Durum)	40	21.3
Oats	85.6	35
Malt barley	74.6	28.3
Feed barley	71.4	28.3
Flax	28.5	10

There was no irrigation in the Morden tests but sowings were in fields where weeds were eliminated. Use was made however of scientifically selected fertilizers.

The report says that ordinary methods of farming may with reasonable care and a little more work, be made to follow the general practices in the Morden experiments.

FUNNY And OTHERWISE

"Is this telegram perfectly clear?"

"No," replied the telegraph operator; "who's Rosie?"

Doctor: "I advise you to take a hot bath before retiring."

Patient: "Before retiring? But I won't be retiring for another ten years."

"An M.P. is supposed to be familiar with all public questions, isn't he?" asked a friend.

"Yes," replied the M.P., "but not necessarily the answers."

Guide: "This is a Roman wall started in A.D. 20."

Bricklayer's Wife: "Lor, Joe, that's the sort of firm to work for!"

Husband: "Every time I look at that new hat of yours I feel I want to laugh."

Wife: "Really! Then I'll leave it about when the bill arrives."

"Did you visit the art galleries when you were in Dresden?"

"We had no need. Our daughter paints."

The old soldier had been telling hair-raising tales, and finished up by saying:

"Many a time I have faced the enemy unflinchingly; but what is life without risks?"

"You're right," replied the timid little man who had been listening.

"Often when the weather forecast was doubtful I have ventured out without my raincoat."

THE TILLERS

The TILLERS

—By Les Carroll

Ontario And Quebec Lead In Family Allowances

OTTAWA. — Hon. Paul Martin, health minister, in a written answer in the commons to a question by P. E. Wright, (C.C.F.—Melfort), said 603,847 families receive family allowances in Ontario and 507,727 in Quebec.

In other provinces the number of family allowances paid as at March 31, this year were: Newfoundland, 50,694; Prince Edward Island, 13,165; Nova Scotia, 91,012; New Brunswick, 72,410; Manitoba, 105,611; Saskatchewan, 116,917; Alberta, 130,686; British Columbia, 156,367 and Yukon and Northwest Territories, 3,833.

The weight of one's body is composed of 5 to 6 per cent. mineral matter.

Success comes in "cans".

HOPE SEEN FOR CANCER CURE IN MUSTARD GASES

WASHINGTON. — A new and apparently more effective method was announced recently of using the "nitrogen mustards"—one time poison gas materials—against human cancer.

"Remarkable" shrinkage of treated tumors and complete relief of pain in 10 hopelessly advanced cases were described by the American Cancer society.

INGERSOLL
a cheese for every taste!

New Menace

Cow Moose Chewing Off Tails Of Farmer's Horses

OTTAWA.—Farmers in the Aylmer district are at loss to know how to cope with a new menace to their livestock. The mystery of what has been chewing up horses' tails was cleared up when Joseph Lusk, prominent farmer and former mayor of Eardley, caught a cow moose in the act of devouring the tail of one of his horses on his farm at Breckenridge.

After discovering eight of his horses with their tails missing below the fleshy part, Mr. Lusk decided to investigate the disappearing tails, believing it might be the work of some prankster or a sneak thief with a new racket. A complete check of his farm revealed no traces of vanished horse hair. But he did notice an unusual large number of tracks made by deer and moose which come down from the Federal District Park and mingle with the farm animals.

Early one morning, while walking through a cedar bush on his back

acres near the mountains, he caught the culprit, a 1,200-lb. cow moose, feasting on the remains of the tail hair of another of his horses.

When the moose saw Mr. Lusk approaching, it meandered towards Beamish Hill on the Mountain Road. Looking back occasionally, and by a display of angry snorting, the moose seemed a little ruffled at being robbed of its apparent delicacy. The horse did not seem to be disturbed with the destruction of his fly swatter. But he may rue the day come fly time.

According to a district man, who formerly farmed above Maniwaki, horse tail-eating by moose was common and had occurred in many regions where moose are more abundant than locally. He believes the moose will chew the hair to obtain salt or the vitamins in horse hair as a spring tonic.

As it takes a year for a horse's tail to grow to its proper proportion, for exhibition purposes, and as this moose had done a bang-up job, Mr. Lusk said he would not be able to show many of his horses at the Aylmer fair this fall. In previous years he has been awarded many ribbons at different fall fairs for his prized stock.

Mr. Lusk rounded up his horses and took them to a farm he has in another area.

YOU'RE TELLING ME

By
WILLIAM
RITT
Central Press
Canadian Writer

A university professor says that radio and television are just drugs that keep people from thinking. Thank goodness they keep us from thinking of making remarks like that!

Java is more densely populated than any other country, with 737 people to the square mile.

The ancient Egyptians used to hatch about 100,000,000 eggs each year by incubation.

An expert tea taster can differentiate among 1,500 to 1,600 different varieties.

Grapevines occasionally contract apoplexy and suddenly wilt and die in full growth.

Maybe the world does improve, but one of the most popular of the new tunes is all about the "dear old days gone by."

In England, we read, dentists are considering using hypnosis instead of anaesthetics to put patients asleep. Don't look at me like that, Doc—that's just a wad of gum!

If this new method of learning while you sleep should spread, the Sunday afternoon siesta on the living-room sofa may make pop a highly educated man.

Two things motivate against shorts for ball players: A ball player's bony knee is no added gate attraction and what would happen to the epidermis on a fast slide into second?

Paris may decree the new wasp-waist style for men but we know just lots of fellows who'll just have to continue going around with that fat, contented bumble-bee look.

In Florida a race was won by a horse named On. Too many bettors found to their sorrow they weren't.

An easterner, we read, has developed a watch which runs backward. Just the ideal gadget to take along on a vacation?

English cloth makers, we read, have produced a suit of men's clothing made of peanuts. Probably a very itchy garment—if the goobers were of the salted variety.

In Paris some toy lead soldiers were auctioned off at \$100 each. Golly, war certainly costs—even in make-believe!

CHANGE COLOR SCHEME TO SOOTHE WIFE

WINNIPEG.—Is your wife excitable? Then change the color scheme of your home.

That's the advice of E. L. McGregor, who calls himself a color dynamic engineer.

The treatment for an excitable wife, he says, is rooms that are painted a cooling, soothing color such as blue or green.

And Mr. McGregor recommends green or blue for some walls in factories, too. He says the dull, grey-white colors in most factories make workers feel they're working in a prison.

2880

It's The Little Things That Make The Style

Rounded contour is the feature of this suit, (left). Note the crescent tucking, and curved pockets. Right, organdy accent makes a faille dress pretty for spring. Large front buttons match sleeve buttons.

Automobile Race Drivers Are Not Superstitious, Says Winner

NEW YORK.—Race drivers aren't superstitious, Wilbur Shaw said, they just don't believe in taking unnecessary chances.

Shaw, three-time winner of the Indianapolis 500-mile automobile race, was explaining away the phobia against green cars and eating of peanuts in the pits which race drivers are supposed to have.

"When I first broke into racing I had to chin myself on the steering wheel to see over the hood," the dapper little man who hasn't grown much in the process, said. "You don't use a clutch so my left foot was idle and I held it cocked over so that the aluminum and the grease off the floorboards rubbed into the side of it until you hardly could tell whether it was a cow coming or going."

"I was proud of those shoes. And they meant a lot to me—but don't call it superstition. It's just one of those things that help you hold your peace of mind in a game like this."

"When I broke in, my hero was a guy named Ford Moyer. He was a big handsome guy and it surprised me when later on he became my mechanic."

"Moyer was my mech in 1949," Shaw added, "when I went after my

third Indianapolis victory. But a week before the race those old shoes of mine turned up missing. Now, as I explained, I'm not superstitious, but it jarred me."

"The day of the race, I went into the garage and there on a shelf was an exact pair of the shoes I had lost. Moyer had even rubbed grease and aluminum paint into that brand new pair of shoes in an attempt to make them look like an exact replica of the shoes which had been stolen—or mislaid."

Shaw won that race, and he admits that those intentionally soiled new shoes played a major psychological part in his third victory in this greatest of all automobile classics where daredevil drivers hit a top speed of close to 170 miles per hour in the stretch.

The Queen To Visit Northern Ireland

LONDON.—Queen Elizabeth will visit Northern Ireland July 14-18. She will stay at Hillsborough Castle with the Governor, Earl Granville, and Countess Granville, her sister.

Black horses are affected by heat more than are horses of other colors.

Herefords Lead Beef Cattle

A great auction sale of Hereford cattle took place recently at Hereford, and buyers were present from all parts of the world, because naturally they expected that if there is any place where good Herefords could be bought it would be in the county town of the county in which Herefords originated.

Hereford is a small county of 842 square miles, and if all the Herefords in the world were to hold an "old boys' reunion, they would overflow into the surrounding counties. There are many millions in Canada, the United States, the South American republics, the Far East and elsewhere. About 90 per cent. of beef cattle herds on this continent are Herefords. For beef purposes they are unsurpassed. They put more meat on their frames with less feed and in less time than any other breed. They are also less subject to disease. Over a period of 38 years, 1,744 cattle were slaughtered in Argentina because of tuberculosis, but only 26 were Herefords.

So far as historians can ascertain Herefords were first developed during the Elizabethan era by two brothers named Tompkins in the village of Weobly, which is still extant in its medieval attractiveness. It was not till 1817, however, that Henry Clay, the American statesman, visited England and bought the first bull, cow and a heifer for his farm in Virginia. That was the "foundation" herd on the American continent. The breed was first introduced to Canada by F. W. Stone, of Guelph, in 1860.

Just 20 years ago the Communist government of Russia imported the first 62 Herefords. Since then, Russia has imported many thousands, and in view of Russia's claims to have been the first with almost all scientific inventions, it will not be surprising to hear them claim to have been the first to breed Hereford cattle.—St. Thomas Times-Journal.

TRY AND STOP ME!

By BENNETT CERF

A bridge expert preferred a bridge game to food, drink, or sleep—except when he drew his wife as a partner. His opinion of her game can be gathered roughly from the fact that under no circumstances was she ever allowed to play a hand in no trump. She accepted this command meekly because, truth to tell, she didn't give a darn about the game, and only played when another couldn't be dredged up for love or money.

At the end of each hand's play she cheerfully expected her husband's cold analysis of all the misplays she had made. On one memorable occasion she bid four spades and after raking in the ten necessary tricks, fluttered her hands nervously, and said, "Oh, dear, I just know I should have made it." The expert reached across the table, patted her on the shoulder, and whispered, "Cheer up, dear, you did!"

The first organized army in the world was that of Rameses III of Egypt.

On The Side -By- E. V. Durling

ON THE SIDE

The Aga Khan now weighs 224 pounds. In 1955 his followers will present him with his weight in platinum. Incidentally, among these followers are the Hunzas, the healthiest and longest lived people on earth. The average Hunza keeps on playing polo when 85 years old. There has been a book written on the Hunza diet. Better look it up if you want some advice on how to live long.

WEDDING MUSIC

What music did your bride select to be played at your wedding? If that happy event has not taken place yet has the girl you are engaged to marry any ideas on the subject? Anyway, a minister of long experience says he has noticed that young women who ask that the song, "My Hero", be played at the wedding are usually around in 12 months or less complaining about the man they married and are soonest to seek divorce.

FEET AND HORSES

Ever know anybody who had feet of different sizes? I am informed there is a surprising number of such people. They must either have their shoes made to order or buy two pairs of shoes of different sizes. . . . The meat shortage must be getting really acute in Merrie Old England. Some of the London newspapers domestic science editors are regularly printing recipes of which horse meat is the major feature. A strange state of affairs in a country in which the national sport is horse racing.

FEMALE OF THE SPECIES

According to hotel men, the toughest of all types of conventions to handle is the sorority convention. After three days of such a meeting, the hotel and everybody in it are usually a wreck. All conventions of women are something of a trial to hotel people. The females have a great talent of making nuisances of themselves. They usually complain constantly. They make things tough for the maids as they are much more untidy than male guests. Practically everything in the place, including telephone books, is smeared with lipstick. Hardly a sheet or blanket is left without a couple of holes in it from burning cigarettes.

X-RAY EYES

Do you own some land on which there might be some oil? Or have you a chance to buy some acreage which might enjoy an oil strike? If so, it is too bad you cannot obtain the aid of Pieter van Jaarsveld, of South Africa. Pieter is known as "the boy with the x-ray eyes." He just looks at the land and states where oil can be found. Pieter is said to have also aided in the discovery of gold on several occasions.

IT'S NOT WHAT IT SEEMS TO BE — When this photograph was snapped, it appeared as if the crew of one of the craft in the cadet dinghy class was taking a ducking during the annual regatta at Melbourne, Australia. But it was just an optical illusion produced as the boat nestled in a trough between the waves of a rough sea.—Central Press Canadian.

RUSSIANS AT WORK—Only a few miles from the nearest United States territory in the Aleutian islands, Soviet citizens dress walrus killed in a hunt along the shores of Gulf of Anadyr in Siberia. Judging by their industry here, they are too busy to be concerned about the political possibilities of their geographical position.—Central Press Canadian.

FARM WIFE'S PRIDE — A spanking team prances down McIntosh Lane of the John Steckle farm at Parkway, Ont. The blossoms and six-acre orchard are Mrs. Steckle's pet pride and joy. Only woman president of the Nova Scotia Fruit Growers' Association, and first woman graduate of O.A.C., Mrs. Steckle knows the fruit industry and farming generally as well as any farm wife in Canada. This is one of the hired men—Asser Lamplinen who came to Canada from Finland 15 years ago, fought with the Canadian Army in Italy and North Africa. A few hives of honeybees handle the pollen department in this orchard. The farm has been in the Steckle family 117 years.

HARD HIT BY DOLLAR DEVALUATIONS—Pulpwood cutters in the Maritimes have also been hard hit by dollar devaluations and loss of markets. In this picture an ox team in Nova Scotia's Queens County is loaded with pulpwood for paper manufacturers.

You can't start too early to gentle horses; here the Percheron mare, Hlva Wanita, grazes without concern while her young son makes friends with the little tot.

NEW U.S. AIR SECRETARY SWORN IN — Thomas K. Finletter, (left), strong advocate of a 70-group air force, is shown being sworn in as secretary of the U.S. air force by Defence Secretary Louis Johnson. Looking on are the retiring air force secretary, W. Stuart Symington, who also backs a 70-group air force, and Mrs. Finletter. Finletter headed President Truman's air policy commission which originally recommended 70 groups.—Central Press Canadian.

SCIENTIFIC AND TECHNICAL ADVISOR—Joan Stevens is the only woman in Canada to hold a position as scientific and technical advisor to a large farm organization. The Surrey Farmers' Co-operative, wanted a university graduate, but were embarrassed when the most suitable candidate was the only woman in the applicants. Nevertheless Joan got the job and the farmers have been everything but sorry since. She handles her work very efficiently and is well liked by the farmers she helps. She is shown above discussing chicks with Lawrence Paget, of Cloverdale, B.C. Right, Joan and G. Franks of the Surrey Centre, have something to say about pigs.

ONE OF MANITOBA'S WORST FLOODS—This is what part of Winnipeg looked like from the air during the recent flood that caused millions of dollars of damage.—Central Press Canadian.

PRIME MINISTER WELCOMED TO SARNIA—Touring Eastern Ontario, Prime Minister and Mrs. St. Laurent stop to study a photo of an oil refinery in Sarnia. The city gave the prime minister a hearty welcome.

TURBINE CAR DISPLAYED—This photograph shows details of the engine arrangement of the experimental gas turbine car recently demonstrated in England. This bird's-eye view of the engine compartment, with the cover removed, was taken shortly before a transparent cover was fixed in readiness for the car's appearance in the British Motor show in New York.—Central Press Canadian.

WORLD HAPPENINGS

BRIEFLY TOLD

All police forces throughout Ontario have been ordered to seize the automobile of any motorist charged with drunken driving and to hold it until disposition of his case.

R.C.A.F. photo squadrons are getting ready for what headquarters sources said may be the "last big year" in a 28-year-old task of photographing Canada from the skies.

The R.C.A.F. has launched a series of long-distance navigational flights deep into the Arctic to provide practical experience for navigators in operational flying over the roof of the world.

A Swedish firm will aid in establishment of a factory in Bombay, India, for the manufacture of penicillin and other sulphur drugs under the terms of an agreement signed with the Indian government.

Four Saskatchewan research council fellowships have been awarded to students at the University of Saskatchewan to assist in research relating to the development of natural resources.

Plans to heat roadways in New Westminster, B.C., by electricity are being studied by city council. The plan would provide electric heat in hilly streets to combat traffic tie-ups in winter.

Potato Disease Threatens Market

WINNIPEG.—Effective marketing of Manitoba potatoes has become seriously threatened by wide incidence of bacterial ring rot in the past few years, F. J. Weir, provincial horticulturist, said.

Certain markets in British Columbia and Alberta, as well as within Manitoba itself, have been lost to provincial potato growers as a result of the disease, he said.

"To retain present markets and regain lost ones, bacterial ring rot will have to be controlled before it is too late," Mr. Weir added.

The provincial department of agriculture has prepared a circular describing symptoms of the disease and proper control measures.

The most practical means of control, it states, is to use disease-free potato seed and isolate it from contaminated tubers.

The circular, available to growers at the department of agriculture's publications branch in the legislative building, was prepared by N. Shenderevitch and Dr. E. T. Andersen of the University of Manitoba.

FLYING CONE LATEST

VANCOUVER.—The mysterious object reported flashing over Vancouver recently was a Seattle-based B-50 bomber, the chief pilot for Boeing aircraft in Seattle said. Numerous citizens said they saw a "mysterious aircraft" shaped like an ice cream cone.

A pretty girl's family must obviously be of the peach variety.

KITCHEN MEDITATIONS

Tribute To A Small Town Doctor

By JANE DALE

Is there a man in your small town today Who has at heart its welfare and fate More than the doctor, a friend and physician, Answering its calls whether early or late?

He brings assurance when the clouds are darkest; Fights for a life until the tide does turn. He makes allowance for all human weakness, And over the stricken does tirelessly yearn.

He does rejoice when some happy good fortune Brings deep joy to a troubled heart; And he is tender when sorrow o'er takes one— More than a doctor; o' each life a part.

They who have never called on his service Knows not the deep kindred spirit he bears. Perhaps just a small town friend and physician;

Yet all of its joys and sorrows he shares!

PRAISING REGINA PATS

Praising the Regina Pats in his Brandon Sun column, Krug Crawford writes: "No salaries and no promises, and the nearest approach to an amateur club we have in Canada. No wonder the west is proud of the Regina Pats."

Worker ants exist only a few months.

Answer To Last Week's Puzzle

COMMERCIAL BEEF CATTLE SET RECORD PRICE

LETHBRIDGE, Alta. — A record Canadian price for a string of commercial beef cattle was believed to have been set here in the sale of 200 Hereford heifers at \$27.50 a hundred-weight.

Canada has no tangible evidence that Russia intends to enter into world wheat-selling competition, Trade Minister Howe said.

HOPE THAW WILL REVEAL LOST PLANE

WHITEHORSE, Y.T. — As snow gradually disappears from lower slopes of the rugged mountain peaks northwest of here, hopes are rising that some trace may soon be found of a C-54 transport that disappeared three months ago with 44 persons aboard.

Black horses are affected by heat more than are horses of other colors.

PRISCILLA'S POP—Double Or Nothing

Treat Bossie Like a Lady She Responds With More Milk

By LUCIA FERRIGO
(Central Press Canadian
Correspondent)

CHICAGO, Ill. — No Follies girl ever led a fancier life. No chorine was ever more pampered and petted. Nor was she given more attention when she kicked up her heels. When you consider that these "girls" have four legs instead of the ordinary two that usually pull the applause and appreciation you're more amazed than ever.

Our "girls" in question are the beautiful, brown-eyed beauties starred in the calf barn on a candy company farm near Cary, Ill., where signs posted throughout the place insist:

"Every cow on this farm is a lady and should be treated as such."

Just what that treatment consists of would floor the average farmer. For instance, each stall is equipped with two thermostats, one to control ventilation and the other, heat. Straw is changed several times daily to keep the darlings dry and clean while the floor is washed down twice a day, as are the tile walls, topped with stainless steel.

An isolation ward, a maternity ward, and indoor and outdoor play pens complete the design for luxurious living. All this backs up the theory explained by William E. Hunter, farm general manager.

"The performance and production of a happy cow—and she first has to be a happy calf—more than pay for the effort and cost expended to human kindness to as great a degree as any other animal," said Hunter.

"By gentle treatment we raise longer living, longer producing dairy cows—and thus increase our farm income, the goal of every farmer."

Then he added: "The future of any dairy cow depends upon the amount of care given her as a calf."

No matter how great its inherited characteristics, no animal can develop properly and in accordance with its fine breeding without proper care and management.

To assure such care, particular attention is given to the dam during pregnancy. The mother is given daily exercise, is put on a special diet, bedded down in thick straw and watched closely at delivery time when a veterinarian is always on hand.

Fifteen to 20 hours after birth the wee'un gets an anti-serum against colds, pneumonia and scours.

For four blissful days the baby is kept with its mother to take advantage of the colostrum milk in her udder before it is sent to the calf barn to be taught to eat away from its mother.

That's where Michael Flamingo,

Little Pineapples

Alice Brooks

Small medallions just 5½ inches in No. 30 cotton. You'll find these handy for summer pickup crochet, and lovely for all accessories.

Quick crochet—easily memorized. Beginner-easy pineapple medallions. Pattern 7046; directions.

Our improved pattern—visual with easy-to-see charts and photos, and complete directions—makes needle-work easy.

To obtain this pattern send twenty-five cents in coins (stamps cannot be accepted) to:

Household Arts Department,
Winnipeg Newspaper Union,
60 Front Street W., Toronto.
Be sure to write plainly your Name,
Address and Pattern Number.

A Cary calf plays hostess in her "swanky" stall to Tommy Kingston, five, son of superintendent of luxuriously appointed Illinois dairy farm.

Ayrshire herdsman, takes over and commands chow time which comes at 6 a.m. and 5 p.m. The baby gets three pounds of milk, heated to 90 degrees, from a rubber udder with a marble inside to regulate the flow and prevent the calf from gulping.

This bucket diet doesn't last for long, only about a week, at the end of which, hay and grain is given to the calves in small quantities. Milk feeding is discontinued at about two and a half to three months, after which the frisky kids eat grain and hay exclusively.

The life of a calf is an ecstatic one being all play and no work. At three months the calves are separated by sexes into groups of three or four and once a day they are turned loose for exercise, outdoors if weather permits or in one of the large indoor "loafing" pens.

At 17 months the heifer is bred and her baby days are over—but the memory lingers on, not to mention the influence of that happy childhood among other over privileged bosses, in this unique home for happy heifers.

Women To Play Enormous Part In Defence Program

VANCOUVER. — Women will play an "enormous part" in Canada's civil defence program, Major-General F. F. Worthington predicted.

General Worthington, co-ordinator of civil defence planning, is making a tour of Canada to evaluate municipal responsibility in the event of any disaster.

"Women", he said, "have really never had a chance to prove what they can do in an emergency. Their contribution in both world wars was a valuable one, but I believe they are capable of much more."

"I propose to see their capabilities are fully exploited in Canada's disaster program."

SMALL PER CAPITA

In the years just before World War II, the yearly per capita income of Chinese in China was only \$19.

**IF UPSET OR SWAMPED
HANG ON
DON'T LEAVE BOAT**
SPACE PASSENGERS EQUALLY ALONG THE SIDES
DISTRIBUTED BY CANADIAN RED CROSS
IN THE INTERESTS OF WATER SAFETY

The above illustrated waterproof transfer is another weapon to use in the Campaign against needless drownings. It is our hope that every boat or canoe owner will place one of these in a conspicuous place on his craft.

Owners of boats, canoes, outboard motor boats and sail boats are urged to secure this free transfer and other free information on water safety and boat handling. Those desiring transfers should send in their name, address and number of transfers required to the Canadian Red Cross Society, 2331 Victoria Avenue, Regina.

PREMIER CAMPBELL TAKES A HAND AT CONTROLS—Premier D. L. Campbell of Manitoba, at the controls of a diesel-powered bulldozer, recently turned the first sod for Imperial Oil's new Winnipeg refinery. The new plant will have a capacity of 10,000 barrels per day and will cost about ten million dollars. It is scheduled for completion in May, 1951. The refinery has been made possible by the Edmonton-Lake Superior pipe line, which is now under construction, and will be supplied from a take-off point near Gretna. It will manufacture petroleum products for distribution in Winnipeg. At the sod-turning ceremony Premier Campbell remarked, "As most of you know, I am more used to the round-mouthed shovel. However, as mechanization plays an important part in our daily lives, it is fitting that petroleum-powered equipment be used to break the sod for this refinery."

Stettler Oilfield Shaping Up As Major Producing Area

EDMONTON. — The Stettler oilfield, 105 miles southeast of Edmonton, is reported by oil officials to be shaping up as a major oil-producing area, with six producing wells completed and more drilling under way. Located a year ago by a Canadian Gulf Oil company wildcat well, the field has been developed mainly by that company.

Production is from the devonian limestone, as in the Leduc, Redwater and Golden Spike fields. The oil is found in two strata about 5,200 feet down, dubbed D2 and D3 in the other fields. It is heavier than that found around Edmonton.

The discovery well, N. J. Ellis No. 4, produced oil at a rate of 1,400 barrels a day from the D2 zone, and 1,800 from the D3. Production is being taken only from the D2 zone.

At follow-up wells clustered within a quarter-mile radius, oil flow from the D3 zone has been as high as 2,000 barrels and from D2 1,800. An experiment now is being made with the company's fifth well to take production from both zones.

Three miles north of the Gulf projects, British Empire Oil Development

limited, an independent Calgary company, got 800 barrels a day from the D2 zone and now is drilling a second well.

Growing interest in the field was reflected in the last sale of crown oil leases by the Alberta government. J. A. N. Belshaw of Toronto paid \$207,789 for oil rights on a quarter section on the northwestern side of the field.

Gulf officials estimate the field has reserves of 100,000,000 barrels. Unofficial estimates have been as high as 150,000,000 barrels.

Turner Valley, 25 miles southwest of Calgary, has produced 100,000,000 barrels and is estimated to have 25,000,000 left. The Leduc-Woodbend field, 20 miles southwest of Edmonton, is believed to have 250,000,000; Redwater, 45 miles northeast of Edmonton, 600,000,000; and Golden Spike, 12 miles west of Edmonton, 100,000,000.

The proving of the Stettler field has renewed interest in further possibilities on the Alberta plains and untapped oil pools in the devonian formation.

On the prairie at Princess, Alta., 123 miles southeast of Stettler, the California-Standard company in 1944 struck oil in the same formation. The pool was small but it sparked the hunt for more.

RECIPES

TEA PUNCH

- 4 teaspoons tea
- 1 quart freshly boiled water
- Juice of 3 lemons
- Juice of 3 limes or 1 cup. lime juice
- Juice of 4 to 5 oranges
- 3 cups pineapple juice
- 1 cup maraschino cherries
- Ice cubes

Make fresh tea, and allow to brew just about 5 minutes, strain and cool. Put ice cubes in punch bowl and pour tea slowly over the ice cubes, add fruit juices to this and blend well. Float 3 or 4 mint leaves on top. Dilute with water if desired.

DATE AND NUT LOAF

- 1 cup dates, cut fine
 - ½ cup sugar or honey
 - ¼ cup butter, melted in
 - ¼ cup boiling water
 - 1½ cups all-purpose flour
 - 1 teaspoon soda
 - ½ teaspoon salt
 - 1 egg, well beaten
 - ½ cup chopped nuts
- Mix dates, sugar (or honey), butter and boiling water; allow to cool. Sift and measure flour; sift again with salt and soda.
- Add well-beaten egg to date mixture, then dry ingredients and fold in chopped nuts.
- Bake at (350 deg. F.) for 50 to 60 minutes.

Smile of the Week--

At the last home talent golf tournament, the club secretary caught one of the entrants driving off about a foot in front of the teeing mark. "Here!" he cried indignantly, "You can't do that. You're disqualified."

"What for?" demanded the golfer.

"Why, you're driving off in front of the mark."

The player looked at the secretary with pity. "G'wan back to the clubhouse," he said tersely. "I'm playing my third stroke."

Worker ants exist only a few months.

Garden Notes

Back Savers

It is a good plan to have a couple of hoes of different size or perhaps one regular garden hoe and a Dutch type hoe. The latter, which is shaped like the letter "D" is one of the very best tools for killing weeds and grass under shrubs and trailing plants and for leaving a fine mulch behind. One should be careful, however, as it will slice off good and bad plants with equal facility.

With the larger gardens, one of the small tractors will save an enormous amount of hand labor. Equipped with cultivator, and possibly also a small disk or harrow, these machines thoroughly cultivate a half acre garden in less than an hour. They are so easily guided too after a little practice that one can cultivate to within an inch or so even of small plants like onions. This means that there will be very little garden left to go over with the hand cultivator.

It's been said before, of course, that a clean, sharp tool does an easier and better job than one that has been left outside all winter.

Chemical Fertilizers

All fertilizers, whether chemical or natural, are used for two purposes—first and foremost to feed the plants, secondly, to speed growth and maturity. The second point is particularly important with vegetables, which should be grown as quickly as possible if they are to be tender, and it is also important with long-season, tender things like melons, squash, cucumbers, corn, tomatoes, etc., especially in areas where the fall frosts come early.

Of the chemical or commercial fertilizers, it is important to realize that these contain three main essentials—nitrogen, phosphoric acid and potash. These are usually shown by three figures with a dash between on the bag or package. As a rule where green growth is the important thing as with grass and leafy vegetables, then a fertilizer rich in nitrogen will be wanted. Where root growth is dominant, as with potatoes, carrots, beets, etc., then a formula heavy in potash would suit. As a general rule a fairly evenly balanced mixture is best for the average garden.

Helpful Hints

Gold and Silver—Clean with mixture of one teaspoon ammonia added to one cup of water.

Seams on linoleum floors can be successfully sealed and smoothed over by running a strip of cellophane tape down the full length of the crack. By using shellac over the tape, the surface will hold up for an indefinite period of time. The shellac coat will prevent dirt from seeping through.

Our Complete Short Story—

A Couple Named Klutz

There's More Than One Way Of Doing Some Things

By HAROLD HELFER

SEE that couple over there? You can't help but laugh a little? But they're real lovers, just as heroic and noble as Romeo and Juliet or this Tristan and Isolde or any in the books!

Sure, he looks ordinary—and comical, too. His weight, if you want to know, is 365 pounds, and his name is Klutz, Bert Klutz.

He always was a big man. But very jolly. Didn't mind kidding about his size. Fact is, he wisecracked about it himself. If he was going somewhere with another person, he'd say, "Well, let's us three go," and things like that.

Bert is a hat manufacturer and he met this Sally Johnson at a convention of hat manufacturers. She was the cigarette girl at the hotel. She was dark, saucy-eyed and on the cute said. She was only about 5 foot 2 and wouldn't have weighed much more than 95 pounds. That didn't

Shelterbelt System

Shelterbelts and good farming work together towards producing good crops, according to Clifford Jones, Netherhill, Saskatchewan, who planted the extensive shelterbelt system pictured here. Those in the foreground were planted in 1949, while those bordering the large fields were set out over a number of years. The trees conserve spring moisture by trapping snow, and in the summer cut down wind damage.

keep Bert Klutz from going completely and absolutely overboard for her.

He'd never had much to do with women before, but he made up now. There can be money in being a hat manufacturer and Bert spent it left and right on Sally. And so they got

married. Well, it was just one of those things, everybody said. Probably last a year. Sally seemed nice enough but you could hardly blame her for grabbing heavy sugar when it was thrown in her lap.

As for Bert, he was as happy as a kid under a Christmas tree—but he began to be sick. The doctors found the trouble right away. Stop trying to diet, they said. Some people were just naturally born to be big. So for a day or so he would eat all right but then he would go back to missing meals and taking reducing pills.

And so Bert kept getting sicker. "What's the sense of losing a few pounds, if you have to spend half your time in bed?" his friends said. But Bert's yen to slim had become a fixed obsession and fixed obsessions were hard to break—all of which might be very interesting but was hardly helping Bert any.

Even Sally lined up with his friends. "Bert, honey, believe me, I'm fond of you the way you are," she said.

Bert would smile and maybe reach out and tickle her ear, and maybe for a while he would eat better, to humor her, but then he would go back to skipping meals.

He got so weak that it became an effort to walk across a room. One of the doctors came out flatly that Bert wouldn't last another six months.

In those six months you never saw anybody cram food down faster—than Sally did. She ate everything in sight, puddings, potatoes, pie and ice cream. The richer and starchier, the better. She ate five or six meals a day. And did the chocolates go!

Now look at the Bert Klutzes. Do you just see a very stout couple who make you want to laugh? Or does it make your heart feel good to know that this fat man, now so chipper and gay, once almost went over the brink for keeps because he thought he was doing something that would make his wife happier and that his wife, now a double-chinned heavy-weight, sacrificed her figure for him? Ah, they're getting up to dance now, the Klutzes. Maybe they're not the most graceful couple on the floor, but can anyone say they're not the most wonderful?

Western Briefs

Unusual Sight

PLATO, Sask.—Lee K. McLeod reported an unusual sight here recently when between 500 to 1,000 white Canada geese landed on a slough and surrounding hills on the D. Maloney farm, five miles southwest of Plato.

Half To Employees

VANCOUVER.—Half of Vancouver's record 1950 revenue of \$27,469,641 will go to salaries and wages of city employees.

Official Opening

FOAM LAKE, Sask.—Official opening of the Foam Lake composite high school will be held June 2.

Junior Ball Event

GRENFELL.—The Grenfell Canadian Legion will stage a \$400 junior baseball tournament on June 5. Outstanding teams from Saskatchewan and Manitoba are being invited and a large entry is expected to play on the four diamonds.

Fair Date Set

GRAVELBOURG, Sask. — Gravelbourg fair will be held July 5 and 6, it was decided at a special meeting of the agricultural society.

Old Way Best

DAUPHIN, Man. — Town council decided it will have none of that city-bred idea. The town won't adopt daylight time this year.

Ideas control the world.

BRITISH OFFICIALS TO VISIT WESTERN FAIRS

LONDON.—Two British livestock officers are to tour Canada this summer, promoting pedigreed British livestock. W. M. Sinclair and T. Allsop will visit fairs at Brandon, Man.; Calgary, Edmonton, Saskatoon and Regina. One of the two officials will remain in Canada to visit the royal winter fair at Toronto.

ALL-OUT CAMPAIGN

CHURCHILL, Man.—Residents of this northern Manitoba town are trying to cut down fire damage. They recently formed a voluntary brigade and arranged for some new firefighting equipment. They now are making a survey to eliminate fire hazards and attempting to procure a water supply for all sections of the town.

WEST OIL FINDS PUTS CANADA IN FAVORABLE POSITION

CLEVELAND.—Oil discoveries in western Canada have put the dominion in a favorable position to meet her own needs, says Dr. Oliver S. Hopkins of Toronto, vice-president of Imperial Oil, limited.

He spoke at an eastern district meeting of the American Petroleum Institute's division of production.

Conservative estimates, he said, "place Canada's undiscovered reserves at 'several' billion barrels."

SMALL PER CAPITA

In the years just before World War II, the yearly per capita income of Chinese in China was only \$19.

Initiative is originality in motion.

Crusty, Crunchy DINNER ROLLS

• They're really ritzy—and no trouble at all to make, with new Fleischmann's Royal Fast Rising Dry Yeast! Gives you fast action—light doughs—and none of the bother of old time perishable yeast! Get a dozen packages—keeps full strength without refrigeration!

CRUSTY DINNER ROLLS

• Measure into a large bowl 1/2 c. lukewarm water, 1 tsp. granulated sugar; stir until sugar is dissolved. Sprinkle with 1 envelope Fleischmann's Royal Fast Rising Dry Yeast. Let stand 10 mins., THEN stir well.

Add 3/4 c. lukewarm water and 1 tsp. salt. Add, all at once, 3 1/2 c. once-sifted bread flour and work in with the hands; work in 3 lbs. soft shortening. Knead on lightly-floured board until smooth and elastic. Place in greased bowl. Cover with a damp cloth and set in warm place, free from draught. Let rise until doubled in bulk. Punch down dough in bowl, fold over, cover and again let rise until doubled in bulk. Turn out on lightly-floured board and divide into 2 equal portions; shape each piece into a long roll about 1 1/2" in diameter. Cover with a damp cloth and let rest 15 mins. Using a floured sharp knife, cut dough into 2" lengths and place, well apart, on ungreased cookie sheets. Sprinkle rolls with cornmeal and let rise, uncovered, for 1/2 hour. Brush with cold water and let rise another 1/2 hour. Meanwhile, stand a broad shallow pan of hot water in the oven and preheat oven to hot, 425°. Remove pan of water from oven and bake the rolls in steam-filled oven for 1/4 hour, brushing them with cold water and sprinkling lightly with cornmeal after the first 15 mins., and again brushing them with cold water 2 minutes before removing baked buns from the oven. Yield—18 rolls.

How many people to the gallon ?

Many thousands of Canadians have a part in making a gallon of Esso available for your car.

About 12,000 of them are employed by Imperial. Some search for new oil fields; some move oil from producing fields to refineries where others make it into Esso and hundreds of other useful products; still others see to it that these are on hand wherever you want them.

Then there are almost 10,000 independent business men who, as Imperial dealers, supply you with our products.

And there are the many thousands of people who derive part of their livelihood from making and transporting the things that Imperial uses in its operations. Last year we bought equipment and supplies from more than 3,000 Canadian firms.

But those are not all.

About 70,000 Canadian residents are shareholders in Imperial or owners of Imperial bonds.

And there are more thousands who have an investment in Imperial through their bank deposits or their insurance policies, because a number of Canada's banks and insurance companies have put some of their clients' money to work to help us do our job.

Finding oil and bringing it to you in the kind of products you need is a big job, a job that requires the skills and the savings of many thousands of Canadians.

Bringing you oil is a big job ... and a costly one

IMPERIAL OIL LIMITED
